

PSPDFKIT

A drop-in-ready framework that helps in almost every aspect of PDF-rendering on iOS.

Next Page

Nobody wants to wait for pages to render.
So we put a lot of work in caching.

PSPDFKit generates static images and thumbnails for your document on the fly. Once processed, it's as fast as displaying an image.
If you zoom, the pdf will be used to render a sharp image.
Best of both worlds!

Powerful examples.

Most developers learn from code. So we built great apps that work out of-the-box. PSPDFKitExample is actually based on an AppStore-App. Want to show magazines? Use it, it's a great start.

Visit <http://pspdfkit.com/documentation/Classes/PSPDFViewController.html>

Customizable to the extreme.

You can use a modal PSPDFViewController for a great out-of-the-box experience, or change almost every aspect. Need a custom toolbar? No problem. Want to embed a pdf view inside your ViewController? Works.

Next Page

We also support embedded webpages.

... or videos, including YouTube.

or audio... . All defined within your pdf.

or whatever you can think of

(Open the EmbeddedExample to see content here)

```
// create the PSPDFDocument (container for one or multiple pdfs)
NSString *path = [[[NSBundle mainBundle] resourcePath] stringByAppendingPathComponent:@"Sample.pdf"];
PSPDFDocument *document = [PSPDFDocument PDFDocumentWithURL:[NSURL fileURLWithPath:path]];

// open view controller
PSPDFViewController *pdfController = [[[PSPDFViewController alloc] initWithDocument:magazine] autorelease];
[self presentModalViewController:pdfController animated:YES];
```

PSPDFKit comes in three flavors.

Binary only

€299.00 EUR / \$399.00 USD

Choose if you don't need a lot customization. You get the drop-in ready PSPDFKit.framework for arm6, arm7 and i386 (Simulator).

[Purchase](#)

Binary + Full Source Code

€599.00 EUR / \$799.00 USD

The sweet spot. PSPDFKit with full source for maximum customization features. You can change every aspect and have full control over the sources.

[Purchase](#)

Binary, Full Source Code + 2 Support Incident Tickets

€1,299.00 EUR / \$1,799.00 USD

Best if you need help to perfectly customize PSPDFKit for your application. You get two support requests where you can request specific additions/changes [within reason] and get priority support.

[Purchase](#)

Purchase options.

PSPDFKit will cost you less than a developer's daily rate, and you've absolutely no risk when buying the source code. You will save at least a month of work.
